Type of resource

Sports session guide and toolkit

Target group

Refugees from Ukraine

Short description

PLAY International has co-created 3 pedagogical kits: one for families, one for children and one for unaccompanied minors. The pedagogical kits are composed of several sessions (about 5). The aim of these sessions is to strengthen the psychosocial skills (communication, mutual aid, emotion management, etc.) of the people, and thus promote their social inclusion. A toolkit (for the whole programme) accompanies these kits.

With 4 years of experience in integration of refugees through sport and the creation of 3 educational kits, PLAY International is composing a specific content for Ukrainian refugees, which will be accessible to several actors of asylum, in France as well as in Europe in border countries.
