Type of resource

Best practice handbook

Target group

Football coaches and youth workers

Short description

Welcome Through Football is an EFDN initiative. Current projects across Europe receive funding from the Erasmus+ programme of the European Union and the UEFA Foundation for Children. The Welcome Through Football 2021 project aimed to assist in the integration and inclusion of recently arrived young refugees, asylum seekers and young people with a migrant background. EFDN and partners developed and tested a European methodology that uses football as a tool to reach refugees and migrants from different ages (7-25 years old) to get them physically and social active in European communities. Moreover, the project assisted football coaches and youth workers in the development and sharing of effective methods in reaching out to the marginalised target group to help prevent racism and intolerance.
